

## Excel price lists via FTP

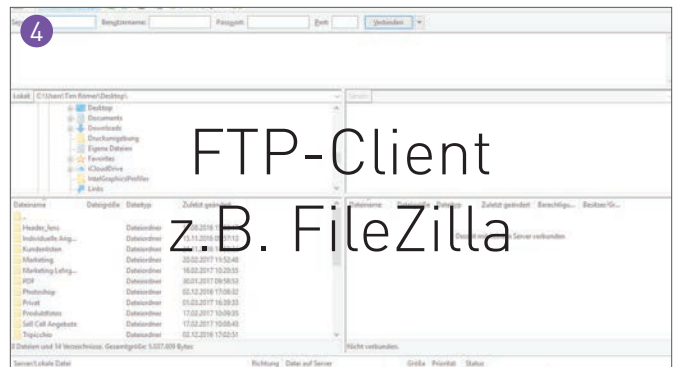

- Enter your webshop with your login [here](#).
- Click on „My account“.

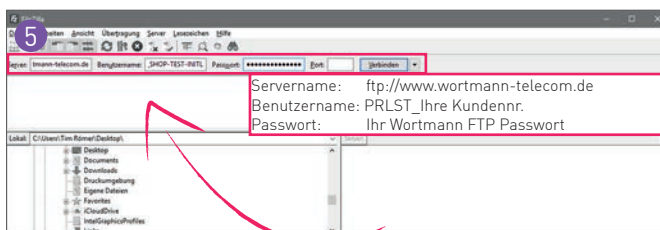

- Click on „Download Price List“.

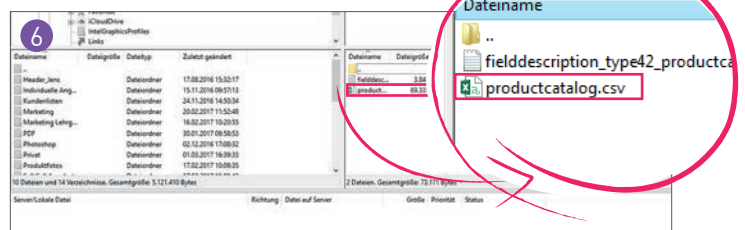

- Scroll to the bottom of the side.
- Here you will find the data needed to **access FTP**.

- Open your FTP client.
- For example „FileZilla“.

- Enter the **access data** from our site.

- Now you can download the latest price list.
- It is called always „**productcatalog.csv**“.
- **Updates:** The files are updated once an hour. The „CSV – Wortmann Telecom“ provides a small and efficient list without detailed product data.
