

EDI Order Connection

Electronic Order Connection Interface definition

EDI connection Electronic order link interface definition we offer article master data in CSV and XML format (BMECAT) for download via FTP. Settings and Further information can be found in our web shop under [„My account“](#) → [„Download Price List“](#). The price lists are generated approximately every 3 hours.

Prices and availabilities, drivers and system certificates can be called up via our customer web service become. You can find information on this in our web shop at [„My account“](#) → [„Customer Webservice \(Realtime-Query\)“](#).

Products can be ordered by sending an XML document via FTP. Responses You will then receive the order confirmation, invoice and delivery note in the same way.

[Here](#) you also find the demo order files [order_12345_25300_201205100919.xml](#) (for standard trading goods) and [order_56789_17523_201508251623.xml](#) (which is a software license order).
