

E-Invoice

Regulation on issuing invoices in accordance with Section 14 UstG for transactions carried out after 31.12.2024

Dear retailers,

we would like to inform you about the topic of e-invoicing and our technical implementation.

An e-invoice must meet the requirements of the European standard EN 16931. The XRechnung and ZUGferd formats from version 2.0.1 (with the exception of the MINIMUM and BASIC WL profiles) meet the VAT requirements for an e-invoice.

The transitional solution, which applies up to and including 2026, includes the option of continuing to send invoices in paper format or as a PDF file.

We must make use of this transitional solution on the basis of the technical implementation. This applies both to the provision and transmission of invoices by Wortmann Telecom GmbH and to our suppliers.

We will probably try to provide you with the **XInvoice** format from **Q3 2025**.

We will keep you up to date on our platform and inform you immediately of any changes regarding the introduction and implementation of e-billing.
