List type

CSV – Wortmann Telecom	Item list including prices and availability Data format CSV
XML – BMECAT – 1031 - german XML – BMECAT – 1033 - english	Item list including prices and availability in XML data format according to the BMECAT standard with item data in the language specified. There is a variant with and one without a ClassificationSystem, which means that the technical data in the "with" variant is in addition to the HTML formatted view also available as individual features. These can be used for structured display or filtering.

Notice
The file with ClassificationSystem is significantly larger than the standard version.

Actuality
The data is generated once an hour. The "CSV – Wortmann Telecom" was specifically created without product data in order to provide a slim, simple list for exchanging prices and availability.
